

## **Potential Future Developments**

1. Increase the inclusion of educational enhancements as appropriate in curriculum, such as the use of video conferencing (Skype, Zoom, Team, Messenger, etc.), on-line courses, video, and audio recordings.
2. Increase post-graduate opportunities for the “practicum” experience in another area or nation within the HOJ-ICBS network of Bible Colleges.
3. Include into the curriculum of additional books authored by HOJGI Directors and HOJ-ICBS teachers from throughout the network.
4. “**Exchange Program**,” where an instructor from one school could exchange sites with a Bible College in another region or nation for educational opportunities and enhancements.
5. Such a program could also be available to graduating students who desire to proceed to a ‘foreign field’ for on-going, post-graduate service.
6. Translate the curriculum into various languages and make them available on-line and in digital format.
7. Record indigenous instructors in video and audio and then uploading those items to make them available on a will call basis to other locations using the same language through the internet.
8. Make available regional, and international congresses and gatherings of HOJ-ICBS network members to advance the goal of the ministry.
